A

B

Identifier Locator Network Protocol

- A "new path" for network architecture

  - Avoid working **against** protocols!

- Separate **identity** and **location**, enabling:

  - Mobility & multihoming

  - Identity and location privacy

- Design goal: **functionality**

Low Carbon Benefits

- Multihoming with aggregatable routing tables

- Cheap mobility handovers

- Green deployability

- Next steps:

  - Ongoing core ILNP development

  - Metrics for environmental impact
